

ABSTRACT OF THE DISCLOSURE

The present invention provides a recycling system ~~of~~ for an aqueous paint in which number of required ~~apparatuses~~ apparatus or equipment decreases ~~equipments can decrease~~ when two or more aqueous ~~paint~~ paints having different ~~paint~~ colors are used in the recycling system
5 ~~for a same aqueous paint~~. In the recycling system, over-spray paints are collected based on their group ~~by group~~ according to a classification based on identity of combinations of pigments contained in ~~said~~ the aqueous paints.
